Handling the Camera
- Do not use the camera near flammable or explosive gases.
- Do not use or store the camera in dusty or humid places.
- Keep young children and infants away from the camera.
  - Always use and store the camera out of the reach of young children and infants to prevent the following dangerous situations which could cause serious injury:
    - Becoming entangled in the camera strap, causing strangulation.
    - Accidentally swallowing cards or other small parts.
- Use microSD memory cards only. Never use other types of cards. If you accidentally insert another type of card into the camera, contact an authorized distributor or service center. Do not try to remove the card by force.

Using the wireless LAN function and Bluetooth Smart function
- Turn off the camera in hospitals and other locations where medical equipment is present. The radio waves from the camera may adversely affect medical equipment, causing a malfunction that results in an accident.
- Turn off the camera when onboard aircraft. Using wireless devices onboard may hinder safe operation of the aircraft.
- If using the wireless LAN function and Bluetooth Smart function in a country outside the region where the camera was purchased, there is a risk that the camera will not conform to the wireless communication regulations of that country. Olympus will not be held responsible for any failure to meet such regulations.

**CAUTION**

Handling the Camera
- Stop using the camera immediately if you notice any unusual odors, noise, or smoke around it.
- Never hold or operate the camera with wet hands. This may cause overheating, exploding, burning, electrical shocks, or malfunctions.
- Be careful with the strap when you carry the camera. It could easily catch on stray objects and cause serious damage.
- If rechargeable batteries have not been recharged within the specified time, stop charging them and do not use them.
- Do not leave the camera in places where it may be subject to extremely high temperatures.
- Handle the camera with care to avoid getting a low-temperature burn.
  - When the camera contains metal parts, overheating can result in a low-temperature burn. Pay attention to the following:
    - When used for a long period, the camera will get hot. If you hold on to the camera in this state, a low-temperature burn may be caused.
    - In places subject to extremely cold temperatures, the temperature of the camera’s body may be lower than the environmental temperature. If possible, wear gloves when handling the camera in cold temperatures.
- To protect the high-precision technology contained in this product, never leave the camera in the places listed below, no matter if in use or storage:
  - Places where temperatures and/or humidity are high or go through extreme changes. Direct sunlight, beaches, locked cars, or near other heat sources (stove, radiator, etc.) or humidifiers.
  - In sandy or dusty environments.
  - Near flammable items or explosives.
  - In wet places, such as bathrooms or in the rain. When using products with weatherproof designs, read their manuals as well.
  - In places prone to strong vibrations.
  - Never drop the camera or subject it to severe shocks or vibrations.
• When attaching the camera to or removing it from a tripod, rotate the tripod screw, not the camera.
• Before transporting the camera, remove a tripod and all other non-OLYMPUS accessories.
• Do not touch electric contacts on cameras.
• Do not leave the camera pointed directly at the sun. This may cause lens or shutter curtain damage, color failure, ghosting on the image pickup device, or may possibly cause fires.
• Do not leave the viewfinder exposed to a strong light source or direct sunlight. The heat may damage the viewfinder.
• Do not push or pull severely on the lens.
• Before storing the camera for a long period, select a cool, dry location for storage to prevent condensation or mold from forming inside the camera. After storage, test the camera by turning it on and pressing the shutter button to make sure that it is operating normally.
• The camera may malfunction if it is used in a location where it is subject to a magnetic/electromagnetic field, radio waves, or high voltage, such as near a TV set, microwave, video game, loud speakers, large monitor unit, TV/radio tower, or transmission towers.
