OLYMPUS QUALITY, DESIGN AND COMPATIBILITY

The Olympus Endoscopic Mouthpiece meets today's needs of a busy GI suite. An increasing number of procedures are being performed and the pressure for fast diagnosis and treatment of patients is a major factor in creating a successful endoscopy department.

Olympus MAJ-168 Single Use Mouthpiece was designed to optimize patient comfort and care of gums and teeth. Ergonomically shaped rear lip guard prevents trauma, injury and scope damage. Provided non-latex strap prevents accidental mouthpiece shifting.

Olympus MAJ-168 Single Use Mouthpiece is perfectly fitted and sized to fit all your Olympus scopes.

- Side connectors and an adjustable strap allow the mouthpiece to be fitted comfortably to the patient.
- Silicone rubber retaining strap prevents the risk of allergy from latex based equivalents.
- Supplied clean in individually wrapped in boxes of 50 mouthpieces.
- Packaging size kept to a minimum with access either through a front flap or from the top of the box, depending on user preference.

SPECIFICATION

The Olympus mouthpiece is manufactured in the UK from polyethylene and is provided with a silicone rubber retaining strap, both manufactured to meet the requirements of ISO 10993 and USP CLASS VI. Aperture is obround in shape and is a minimum of 20mm (H) x 27mm (W).

Olympus reserves the right to alter the specification without notice.
