RHINO-LARYNGO FIBERSCOPE OLYMPUS ENF TYPE XP

The Optimal Choice for Observation of Narrow Upper Airway Passages

A detailed photograph of the Olympus ENF Type XP rhino-laryngo fiberscope. The device is shown in a dark, moody environment with a blue and white color scheme. The main body of the scope is white and black, with a long, thin, black flexible tube extending from the handle. The tube is curved, showing its flexibility. The handle has a large, circular lens at the top. The background is dark with some light flares and a faint grid pattern.

Ø1.8mm

Ultra-Slim 2.2 mm Insertion Tube—Perfectly Sized for Narrow Nasal Cavities.

Featuring an ultra-slim insertion tube diameter of 2.2 mm as well as high resolution optics and brightness, the new Olympus ENF TYPE XP is perfectly suited for observing the nasal cavity, larynx and pharynx. Optimally sized for narrow nasal cavities, it also makes observation of adult paranasal sinuses easier than ever, while its angulation range of 130° both up and down enables trachea insertion maneuverability. For minimally invasive insertion and clear, reliable observation, depend on the Olympus ENF TYPE XP Rhino-Laryngofiberscope.

Ultra-Slim 2.2 mm Insertion Tube Diameter
Optimally sized for smaller nasal cavities. This endoscope also makes observation of adult paranasal sinuses easier than ever.

Wide Angulation Range—130° Up and Down
The endoscope wide bending range of 130° up/130° down allows trouble-free insertion, even through the trachea, allowing you to focus more on observation.

Specifications

Field of view	75°
Depth of field	2.5~50 mm
Range of tip bending	Up 130°/Down 130°
Distal end outer diameter	ø1.8 mm
Insertion tube diameter	ø2.2 mm
Working length	300 mm
Total length	530 mm

Olympus Rhino-Laryngofiberscope Line-Up

Versatile, durable and reliable Olympus rhino-laryngofiberscopes ensure smooth operation. A full range of rhino-laryngo fiberscopes for your procedural needs. Olympus rhino-laryngofiberscope—the right choice for superior performance.
