EVIS EXERA COLONOVIDEOSCOPE/SIGMOIDVIDEOSCOPE
OLYMPUS CF TYPE Q160L/I/S

TODAY'S MOST VERSATILE CHOICE FOR COLONOSCOPY

Offering sharp, clear images, large image size,
and auxiliary water capability for easy removal
of mucus and stool inside the colon,
this is today's most versatile scope
for colonoscopic examination and treatment

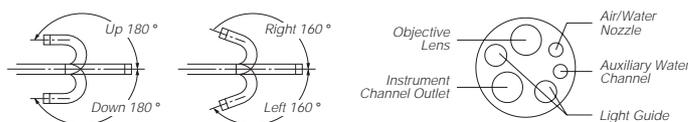

Enhanced Versatility and Outstanding Performance

- Superior image quality with large display size provides enhanced details throughout the image plane.
- When used in combination with our dedicated flushing pump and CV-160 video system center, a continuously clear view is ensured by an auxiliary water function that removes mucus and stool inside the colon at the touch of a switch on the scope. 
- Extra-wide 140° field of view and extensive 4-way angulation (180° up/down and 160° right/left).
- 3.7 mm diameter channel can handle a wide range of treatment requirements and provides high suction capability even when forceps are being used.
- Ergonomically designed grip enhances scope maneuverability while redesigned easy-to-access knobs and user-selectable switches improve operability.
- Fully compatible with the CV-160/140.
- Scope ID function stores individual scope information and displays it on the monitor to facilitate endoscopy suite management.
