

## BM-windream System Requirements

### Server Systems requirements:

1. Software(OS):
  - Windows 2000 Server (Service Pack 2) (recommended)
  - or - Windows NT 4 Server (Service Pack 6a and IE 6)
  
- Database:
  - SQL2000 (included in BM-windream StarterKit)
  - or - SQL 7 (Service Pack 3)
  - or - Oracle 8.1.7 (pref. for datavolume above 2 million files)
  
2. Hardware:
  - Pentium 400 Mhz, preferably more
  - 256 MB RAM, preferably more
  - Hard disk: min. 8 GB (program, services, temporary files, archive pools, etc), plus data (min. 1GB)
  - Display: min. 800x600 VGA

**IMPORTANT:** BM-windream server-components require an installed **SERVER**. You cannot run BM-windream Server on a workstation. The Server must not be a BDC. It is recommended to run BM-windream Server on a memberserver if a domain is at hand. It may be installed on a PDC (not recommended!).

### Client System requirements:

1. Software (OS):
  - Windows2000 (Service Pack 2) (recommended)
  - or - Windows NT 4 Workstation (Service Pack 4)
  - or - Windows 98 (2<sup>nd</sup> edition)
  - or - Windows 95 (SR2)
  
2. Hardware:
  - Pentium 266 Mhz, preferably more
  - 64 MB RAM, preferably more
  - min. 20 MB free hard disk space (50 MB recommended)
  - Display: min. 1024x768 SVGA

### Network requirements:

- TCP/IP configured

**Important:** If the *Signature for BM-windream* module is part of your installation, a domain with installed certificate services is absolutely necessary. Else you may run BM-windream in a workgroup surrounding, too.
