

March 11, 2020

Dear Valued Customer:

As your trusted partner in medical technologies and services, we are writing to provide an update on Olympus' response to the novel coronavirus outbreak.

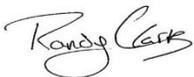

- Olympus Medical Systems Corporation continues to monitor the latest developments on COVID-19 (coronavirus disease 2019) to ensure we are able to provide timely and appropriate guidance to our employees and stakeholders. As part of our process, we are relying on these updates from national health protection agencies worldwide, including:
 - Global: World Health Organization (WHO)
 - <https://www.who.int/health-topics/coronavirus>
 - <https://www.who.int/emergencies/diseases/novel-coronavirus-2019>
 - United States: Centers for Disease Control (CDC)
 - <https://www.cdc.gov/coronavirus/2019-ncov/index.html>
 - Europe: European Centre for Disease Prevention and Control (ECDC)
 - <https://www.ecdc.europa.eu/en/novel-coronavirus-china>
 - Japan: Japanese Ministry of Health, Labour and Welfare
 - https://www.mhlw.go.jp/stf/seisakunitsuite/bunya/newpage_00032.html
 - NIID - <https://www.niid.go.jp/niid/en/>
 - China: Chinese Center for Disease Control and Prevention
 - <http://www.chinacdc.cn/en/COVID19/>
- In addition to implementing employee travel bans to impacted regions, Olympus has, as an additional precaution, implemented a temporary restriction on non-essential business travel.
- During this outbreak, Olympus is paying special attention to our role in infection prevention. As COVID-19 is a new virus, specific claims have not yet been validated for Acecide-C, the predominant high-level disinfectant used with Olympus automated endoscope reprocessors; however it is important to note that research has shown that coronavirus strains preceding COVID-19 are easily destroyed by liquid chemical germicides.¹ Acecide-C is manufactured by Best Sanitizers Inc., which has also stated its commitment to the highest level of surveillance of the current situation. We will continue working closely with Best Sanitizers Inc., with infection prevention societies and with all regulatory agencies addressing this important human health concern. A statement from Best Sanitizers can be found here: <https://medical.olympusamerica.com/customer-resources/cleaning-disinfection-sterilization/alerts-statements>
- Olympus recommends that customers continue to reprocess their Olympus medical devices according to the Olympus Instructions for Use.

The novel coronavirus is a serious situation for the consideration of all, but particularly those in the healthcare community. Olympus will continue its monitoring of the situation, in accordance with the company mission of making people's lives healthier, safer and more fulfilling around the world. Our broader contributions from a humanitarian perspective are referenced in a press release from the industry association AdvaMed: <https://www.advamed.org/newsroom/press-releases/medtech-fighting-coronavirus-multiple-fronts>.

Please contact us with any questions.

Best regards,

Best regards,

Randy Clark
President
Medical Systems Group
Olympus Corporation of the Americas
